Tutorial to Install Joomla in CPanel

1. we will be installing Joomla using cPanel and the cPanel file

Install Joomla with cPanel

2. Begin by uploading the Joomla tar.gz file to your website

3. Browse to the file on your harddrive

Choose file					2 🔀
Look in	; 🔁 joomla		• 4	• 🗈 💣 💷 •	
My Recent Documents Desktop My Documents	Doomla_1.0.	1-Stable.tar			
My Computer	-				
My Network Places	File name:	1		•	Open
, aces	Files of type:	All Files (*.*)		-	Cancel

4. Double click the file to upload

	Click on a folder icon to navigate. Click on a name to view its properties.		Upload St Settings\Administrato
1	/ public_html / joomla / (Current Folder)		stable.tar.gz (Joomia succeeded.
0	Create New Folder		
1	Upload file(s)		
1	Up one level		
💽 dha	Create New File		
	Joomla_1.0.1-Stable.tar.gz	1723 k 0644	
	You can now see your file has been uploaded		Trash
	You can now see your file has been uploaded		Click on the trash Click on the trash Click on an object
	You can now see your file has been uploaded		Click on the trashe Click on an object
	You can now see your file has been uploaded		Click on the trashe Click on the trashe Click on an object

5. Click Upload to upload the file

	Click on a folder icon to nav Click on a name to view its pro	igate. operties.		Show File Contents
	/ public_html / joomla / (Current Folder)	want to overact the	S FILS	Delete File
1	Create New Folder	S WALLE LO SAU AUL UN	011101	Edit File Change Permissio
1	Upload file(s)			Rename File Copy File Move File
0	Up one level			File Url: http://ww
	Create New File			support.com/joon Stable.tar.gz
-	Joomla_1.0.1-Sthele.tar.gz	1723 k	0644	
				Click on the trash
			\square	

6. A new window will open verifying the extracted files
